

The Frey family team

Six specialists, one point of contact. Modeled on Jesse Genet's household AI team. Here is what each can do for you.

Lloyd CHIEF OF STAFF

- Your single point of contact. Tell him what you need; he does it or hands it to the right specialist.
- Books appointments and adds your and Nic's work calendars automatically.
- Reads a forwarded PDF or calendar invite and acts on it.

EXAMPLE "Lloyd, book Fox's dentist Thursday at 2." He creates the event and, because it is during the workday, invites both work calendars.

Patrick FINANCE

- Flags a duplicate charge or a subscription whose price jumped.
- Summarizes where the month's money went, by category.
- Surfaces the action and lets a human do it. He never moves money.

EXAMPLE "Heads up: the streaming bundle went from \$19 to \$29, and there is a duplicate \$14 charge from the 3rd."

Carmine KITCHEN AND MEALS

- Plans the week around what is already in the fridge, to cut waste.
- Knows the family's allergies and dislikes (no nuts for Fox) and plans around them.
- Snap a photo of groceries or a receipt and he updates the inventory.

EXAMPLE "This week's dinners use the salmon and chicken before they expire. Thaw the salmon Tuesday morning."

Shey RESELLER AND ARCHIVE HUNT

- Watches Poshmark, eBay, Vestiaire, The RealReal and 1stDibs for a target piece and flags strong matches.
- Drafts a listing to sell something. You approve before it posts.
- Catalogs an item from a photo.

EXAMPLE "Found the Margiela Tabis in your size on Vestiaire, \$310, very good condition. Want the link?"

Steve DEVELOPER

- Builds small household apps and automations. Genet's developer built a kids' TV app limited to approved channels.
- Proposes changes as clear plans you approve. He never ships on his own.

EXAMPLE "Here is a plan for a one-button kids' streaming app that only plays channels you approve. Say go and I will build it."

Frank HOME AND IT SECURITY

- Flags a suspicious login, a breached password, or a device missing updates.
- Spots phishing in the family inbox and warns you.
- Advises only. He never disarms an alarm or changes a setting without your say-so.

EXAMPLE "A login to your email from a new device in another state just now. If that was not you, change the password. Want the steps?"

How it works

- Reach the team by texting or emailing Lloyd. He routes to the right specialist.
- Anything that spends money or sends on your behalf needs your okay first, with one reply.
- The team also checks in on its own and flags what needs you.
- The team learns as you go. Tell Lloyd a fact and he remembers it; say "always" or "never" and it becomes a standing rule. For example "Carmine should never plan nuts for Fox" sticks from then on.

Status: the specialists, scheduling, document and photo intake, and the approval gate are live. Text messaging and a Slack workspace are finishing setup.
